Description:

The Diamond Bearers Secret, book five of The Unaltered. Calli learns that everything shes been through since receiving a diamond has been in preparation for a much larger purpose. An event looms in the future that could end life as she knows it and her assistance is crucial. The problem

is, the Diamond Bearers are dividing at a time they should be uniting and she is viewed as a young upstart by centuries-old comrades. They're not about to let her upset their ranks or move forward with plans that go against their thinking. They're unaware Calli can hear their grumbings and, through her, Crimson. Neither Calli nor Crimson back down. The ultimatum still stands: support nature or surrender your diamond. Problems arise over an anonymous blog revealing critical information about people with powers. The blog must be stopped before the secrets of the Diamond Bearers are released. Unfortunately, the powers contained within the Sanguine Diamond don't include the ability to shut down a blog--nor do Diamond Bearers rooted in antiquated practices have a clue about how to address this life-threatening issue. Only those who understand how the virtual world works can fight against a virtual enemy. With everything escalating around them, Chris and Calli still find time to get to know each other better. Will they like what they find? What other information will be found within the files from General Hardings' compound? The more pressing question is, are Crimson and Maetha still keeping secrets from Calli? A #1 bestseller in eleven countries, with over 225,000 downloads, the Unaltered series readers have shown their love with over 1,200 5-star reviews. The tale woven is one that feels ensconced in today's world alongside a huge dose of superpowers. Currently being optioned for film and television, so don't miss your chance to read this exciting series before it hits the screen.

Unfortunately I was disappointed in this 5th book of the series. It has veered off track into a political/anti-religious platform for the author. Although I don't necessarily mind reading differing points of view on these highly charged topics it's not what I was expecting after reading the previous four books of this series. I have always appreciated that Calli and company had always been open-minded and compassionate. I find that some of the characters become harsh. While I have my own personal beliefs I also believe that others are entitled to their own. I felt that the author and characters made it clear that you either agreed with them or you were wrong, especially Calli. I wanted to read this book to enjoy a believable world outside of reality. Instead I found myself reading what felt like unending political/anti-religious propaganda that added nothing to the story, nor did those scenes make any kind of sense with the previous books. I also felt there wasn't much story in this book. The characters make a few discoveries, but nothing all that productive happened. I became bored pretty quickly and had to push to finish the book. There is some excitement in the end of the book that was really good. Calli and Chris's relationship also left me feeling let down. I didn't see enough of their interactions and when I was able to see them together it felt like revisiting junior high. The positive points of this book were that the author kept the sexual content and violence PG which I truly appreciate. Many authors these days are too quick to go down that path. The editing was very good for the most part. I did find a couple of editing issues but nothing too distracting.

Keira doesn't like the chauffeur or the gate keeper and knows there is someone else in the estate. Doesn't get into too many details, but that isn't the point of this book. Although this Hercules is certainly not as saintly as his television/movie counterparts, he is still a relatively gentle and simple soul who captures the reader's sympathy. The book is beautifully illustrated. It also includes some rather superb photos all in glorious colour and of which my favourite is probably the gilded Roman cavalry helmet. He'd also love for his grandfather to learn how to read, and Tess seems like the perfect teacher for him. He must lie flat on his back. It feels like so much reportage.
